

Step 08a. Simple Materials List

Mr. M. Gonzalez

Name	Date	Class	Grade

Project Topic/Title:_

Directions: Your materials list includes all the items you used or will use during your project that are not common. For example, you will want to omit the use of pens, paper, computer, etc. However, if you used software to acquire and analyze data you should include this in your list. You must also specify the quantity of items used and the specific function each one had/has. Specialty equipment like sondes, probes, etc require the model number.

Item	Quantity	Function

Item	Quantity	Function
