

The next parameter we will look at is Dissolved Oxygen, often abbreviated as DO. Before looking at the data, we'll start with a review of what we mean by dissolved oxygen.

First open and print a copy of the Student Journal page and answer the questions as well as you can. It is not a test! It's simply a chance to check your own knowledge. You'll have a chance to correct any answers that require it in a little while.

Next open and read the Student Reading entitled **Oxygen Underwater**.

Finally, make any changes you'd like to the answers you gave earlier on the Student Journal page.
